Mollycoddle Medicines

To please your taste medicines have been masked by sweets and good tasting coatings until their efficacy is weakened—until their value is almost nothing. You take a bottle of this pleasant-to-taste kind, and get no actual results. You feel worse, look worse and wonder why medicines don't do any good.

Start the Bile

Bile is poison if it gets into the system. As long as it stays in its place it only poisons the germs that get into the intestines, but when the liver dams up and clogs—then the bile escapes into the system. It makes you stupid—tired—miserable. And the only remedy is to get the liver working. With the liver normal, the bile goes back through the bile duct to the duodenum, there to kill disease germs in the food and to lubricate the intestines. This means a normal elimination that soon frees your tissue of the poisonous bile, clears your eyes and skin and makes you feel like a real live human being again.

Start the Bile

Carlstedt's Liver Powder is an old-fashioned liver powder—in bottles—yet is a powder. You put a spoonful in a glass of water—then drink it. You will frown a bit, but tomorrow you will smile a lot. In a day or two you will see what it means to take the good old-fashion bile starting medicine—medicine free of "dopes"—"calomel" and "minerals."

We will wager the price of a bottle that you will stick to Carlstedt's once you try it. If you have no family, get a 25c. bottle, if others look to you for health, get a dollar bottle. In either case, you can have your money back if Carlstedt's Liver Powder doesn't start the Bile.

"USED FOR SEVENTY YEARS."

KENTUCKY UNITS MAY GO SEPARATELY

Think Troops Will go to Border When Recruited at Least to Peace Strength

Ft. Thomas, Ky., July 25.—With the expiration of the Louisville boys' first month at Ft. Thomas, the uncertainty surrounding the war department's plans for the brigade is as baffling and impenetrable as ever. The net result of the best opinion in the camp's official circles is that the troops will be moved to the border by separate units only as they are recruited at least to their peace strength.

It was admitted in usually advised quarters tonight that intimations from Washington pointed to a change of intentions since the first part of the month, when it was indicated that the units would not wait for recruiting.

Thus the departure for the border situation appears at the moment to have been simplified to a question of results. On the success of the recruiting officers sent out, will depend the departure of the troops.

The Second Regiment was ordered out on a five mile hike through the country this afternoon by Brigadier General Rogers Williams.

It was explained that after the long quarantine and in view of their apparent restlessness, "a little exercise would do them good."

The quarantined, however, has not been lifted and after the hike, the men were marched back to their camp where they will remain isolated from the rest of the encampment until the allotted fourteen days have expired.

This period will end next week. Fifty of the rejected men of the regiment were sent home today.

The Strong Withstand the Heat of Summer Better Than the Weak

Old people who are feeble, and younger people who are weak, will be strengthened and enabled to go through the depressing heat of summer by taking regularly Grove's Tasteless Chill Tonic. It purifies and enriches the blood and builds up the whole system. 50c.

Avoids Breakfast Cooking--

New Post Toasties are ready to eat direct from the package. They have a fine new flavour—self-developed by a new patented process. It's the rare, true flavour of prime, white Indian corn itself, and these New Toasties are the first corn flakes that do not depend on cream and sugar for palatability.

The proof of this superior flavour is found by eating some from the package dry. They're deliciously good that way, but of course are usually served with cream or good milk.

Examine the New Post Toasties flakes. The quick, fierce heat of the new process of manufacture, not only raises the distinguishing little bubbles on each flake, but gives a body and firmness that makes the New Toasties a more substantial food than ordinary "corn flakes."

New Post Toasties do not "chaff" or crumble in the package, and they don't mush down when cream is added. They come to you untouched by hand, and in moisture-proof packages that preserve their delightful oven-crispness until served at your table.

Well worth trying—these
